External Email - Exercise Caution

Hi Helene,
certainly. Attached is a file with 2 lists (and their codes). "List 1" is the species on the BCI 50-ha plot and on Gigante. "List 2" has more species from other local plots.
Best,
Stefan

Hi Stefan,

I'm writing to ask if you would be willing to share a list of all the liana species that your team has encountered in BCI and in the larger BCNM.

I ask because I'm working on assembling an updated list of woody plant species for BCI, and one for the BCNM more broadly. We need these lists as input for the efforts to develop tools for automatic species classification of photos of plants on BCI and the larger BCNM. The updated list would be published as a checklist on GBIF, and be the foundation for an associated PlantNet project for BCI (which would be available to anyone using that app), and we would use it to determine which taxa appear as choices in forms for collecting data in the field and for identifying plants in photos.

I'd appreciate any species lists you can share.

I'll forward some associated emails for your info.

Best regards,
Helene
